MOSAICLEGS ART STUDIO

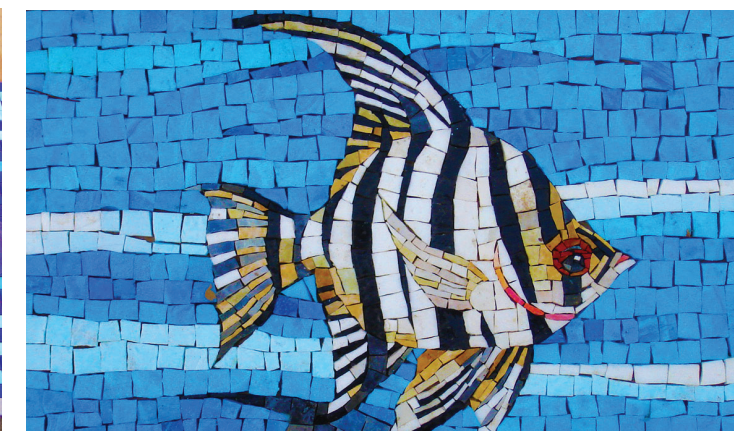

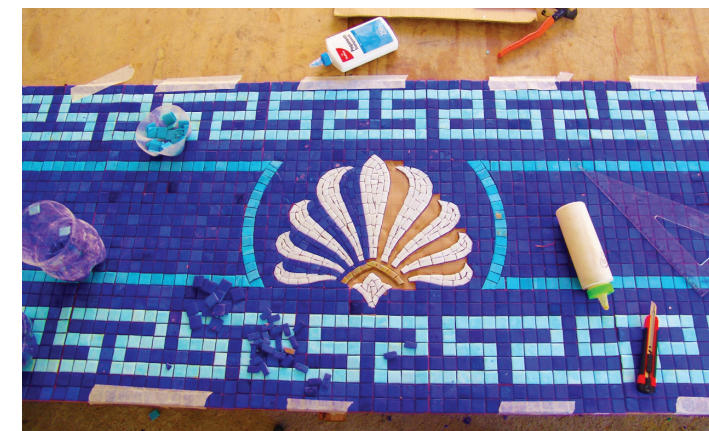

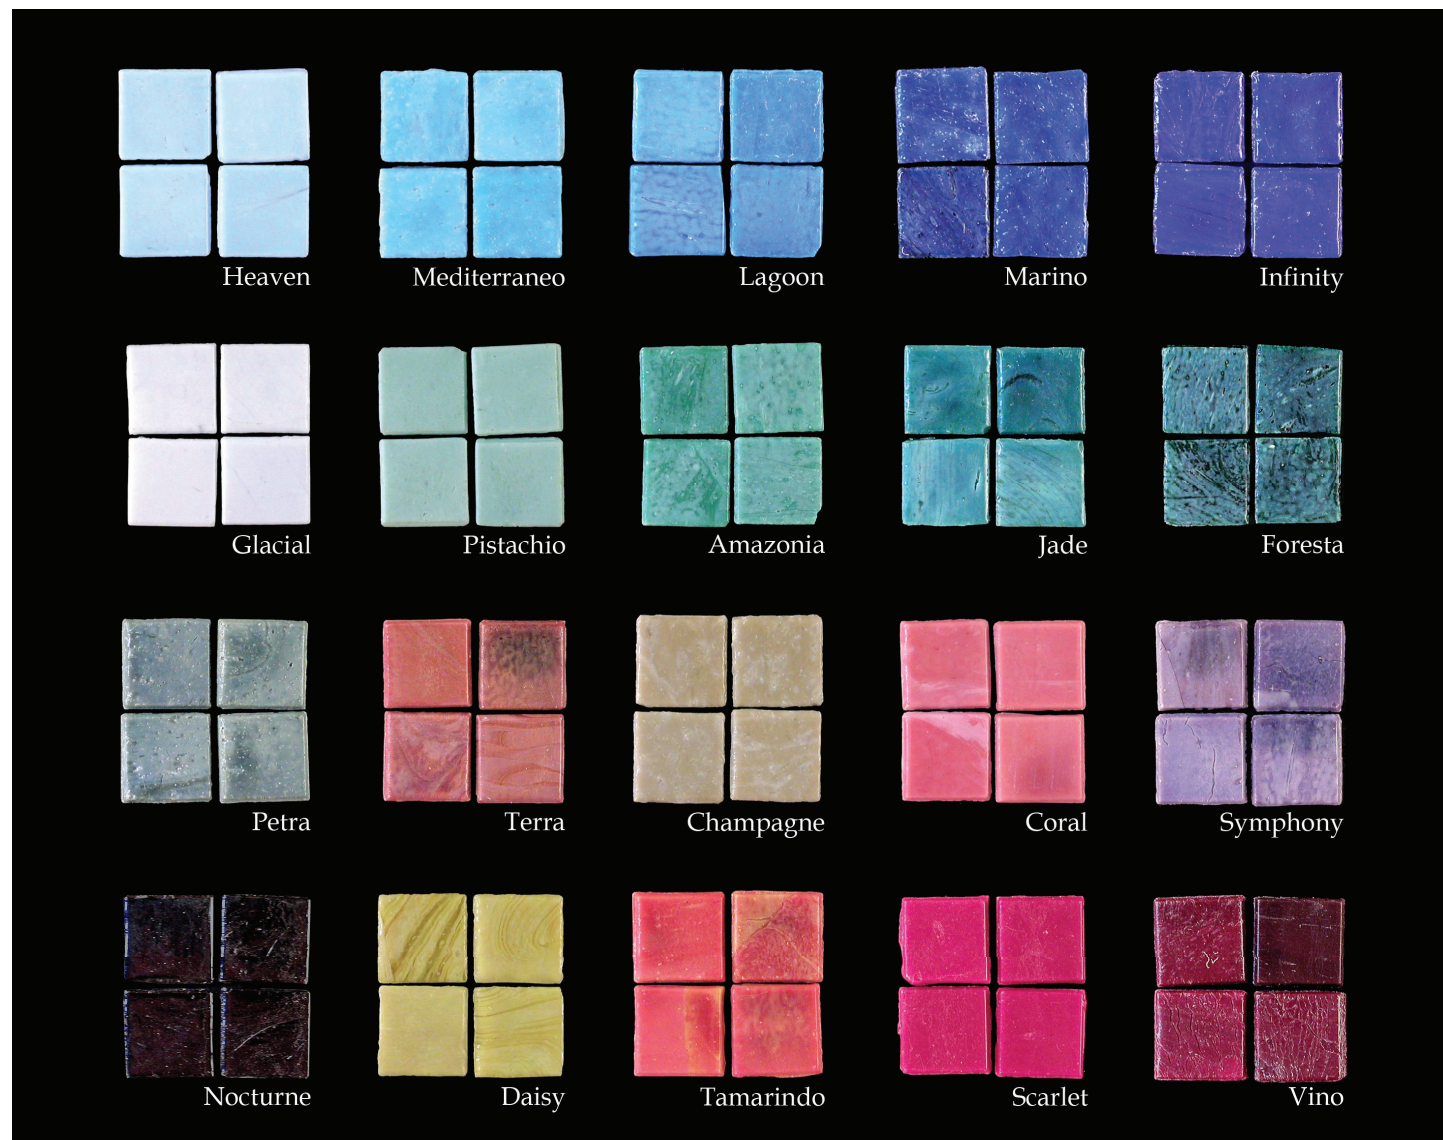

Mosaiclegs specializes in architectural mosaic design. Our mosaics have been widely specified for commercial and residential swimming pools, artistic murals, hotels, airports, and interior and exterior applications throughout the world.

Our byzantine studio preserves the ancient techniques of handcrafted mosaic creation using byzantine glass, venetian glass, marble, and river rock.

THE DESIGN PROCESS

Mosaiclegs begins the process by discussing and creating a rendering/digital layout of the project or design.

Once a design is chosen we will create a sample board of the mediums and colors for the clients review and approval.

MEXICO CITY

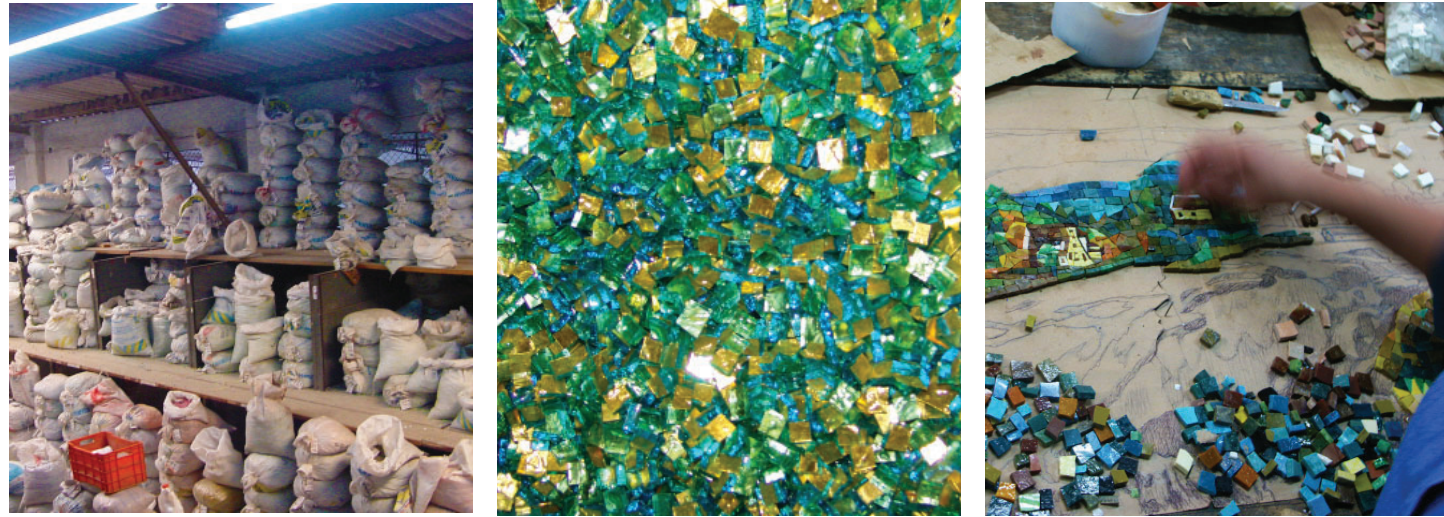

Once colors and design have been approved by the client we begin the fabrication process which we will continually update you with images of your project underway.

MATERIALS

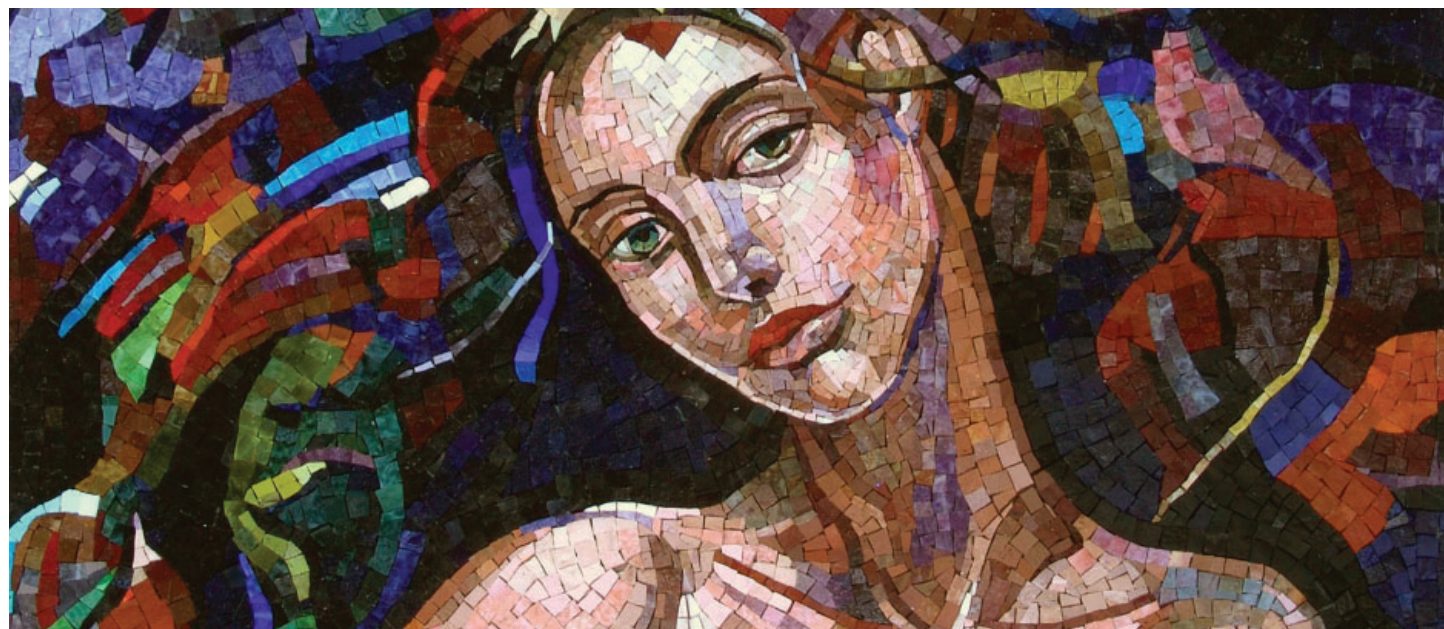

This can be natural stones, smalto glass, vitreous glass, river rock and byzantine smalti.

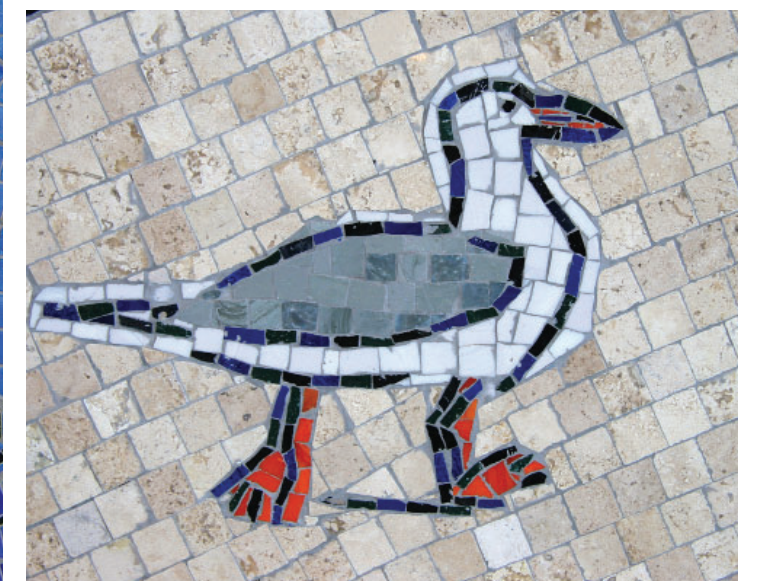

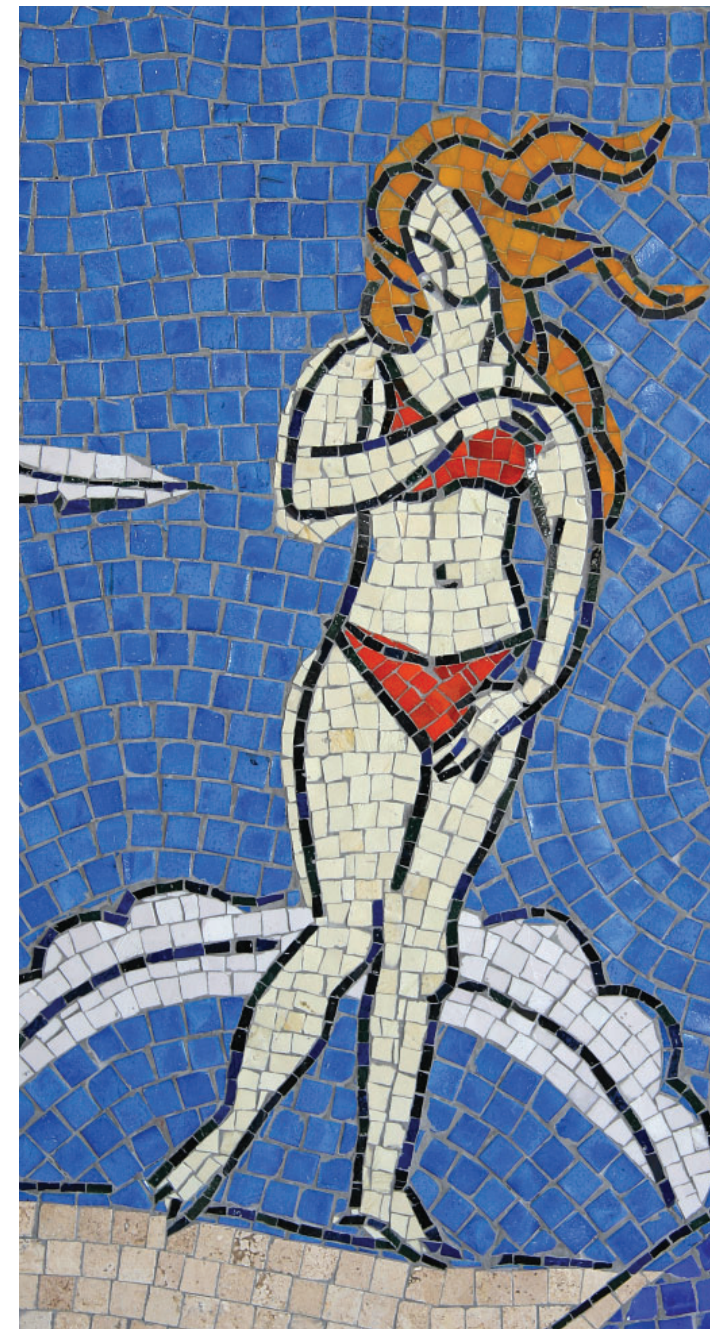

Our main medium is byzantine smalti which is used specifically in our custom detailed art work.
